GLOBAL STEEL BUILDERS

HIGH QUALITY AND A FIRM PLAN

REMCO.NL/EN

STEEL SYSTEM BUILDING

MORE THAN 5,000 PROJECTS

Our building system can best be described as 'bespoke solutions based on standard modules'. Many elements for your new building are pre-manufactured in Europe. These prefabricated parts - such as the steel structure and wall and roof elements - are delivered to the building site and then assembled by our building teams.

Since we were founded in 1972 we have completed more than 5,000 projects worldwide for industrial buildings ranging from a couple of hundred to tens of thousands of square metres.

TURN-KEY

Choosing Remco International is choosing one stop shopping. From design to turn-key delivery: Remco International arranges everything for your company.

We take care of the engineering, production, transport and assembly. And during the assembly period, there is always at least one of our experienced Supervisors on site.

HIGH CUSTOMER SATISFACTION

We pay a lot of attention to customer satisfaction as part of our business operations and we are proud that this pays off: many clients have returned to Remco International to once again rely on our trusted approach for expansion or new build projects!

"Professional, reliable, all relevant knowledge and experience on board."

**OUR CLIENT BASE INCLUDES
LARGE INTERNATIONAL
COMPANIES AND
ENGINEERING CONSULTANTS.**

Safety is our number one priority.

RELIABLE BUSINESS PARTNER

MAKE THE RIGHT CHOICES

If you have plans for a new building project, there are lots of choices that you will have to make. You will have to set requirements regarding the look, layout and furnishing of your business premises and you will have to deal with several different government bodies. We know what paths to take, where bottlenecks may occur and how to do something about them on time. Our building system guarantees high quality and a short building time at a price that is agreed in advance.

CORPORATE SOCIAL RESPONSIBILITY

We build international projects together with local workers. This is both a source of income for the local people involved, as well as giving them a lot of experience that they can use in their future careers. The safety of our own staff and the parties with whom we work together has first priority. That speaks for itself.

WORK SAFETY

The safety of our own staff and the parties with whom we work together has first priority. That speaks for itself!

Remco International is VCA** certified and works in accordance with this certification.

YOUR 5 STEPS

STEP 1

Our partnership starts with an intake meeting between you and one of our advisers during which we list of your requirements, wishes and expectations. We aim to look at things from your perspective in order to achieve the best and most suitable new building for you.

STEP 2

Based on the schedule of requirements discussed, a quotation will then be drawn up. This quotation is accompanied by a preliminary design and a technical description.

STEP 3

Are you completely happy with the plans? If so, then we come to an agreement, after which we will start on the final design and the construction drawings and calculations. As soon as these documents have been approved, we start the technical work preparation and we start producing the materials that are needed to build your business premises.

STEP 4

Depending on the scope of the project, the materials will be produced and supplied in one or several phases. The materials are then loaded into shipping containers. Transport can be arranged by Remco International in various ways, according to the applicable Incoterms. We also arrange the export documents that are required to allow the goods to be transported.

STEP 5

As soon as the containers have arrived at their destination, we start assembling the building materials. Our assembly teams consists of a supervisor who represents Remco International and local workers. Together, we ensure that your business premises is built according to the previously discussed quality standards, safety standards and planning.

PART OF JANSSEN DE JONG GROEP

COMMERCIAL REAL ESTATE

Remco International is part of Janssen de Jong Groep and together with Hercuton, Remco Ruimtebouw, Woody Building Concepts, Ocmer, Pvvvt and ServicebouwPlus it forms the Cluster Business Premises. We provide clients of commercial real estate in the Netherlands and abroad with various specific product-market combinations. Together, we offer the best solution for every commercial property issue.

THE SOLUTIONS

We each operate under our own brand name and have a great deal of knowledge and experience. Each of us offers specific added value for our customers. We use advanced prefabricated construction methods in concrete, wood and steel for new building projects. Maintenance, renovation and alterations of existing commercial real estate are also part of the product range of our Cluster.

CUSTOMER FOCUS

Together we offer the solution for every customer demand. First of all, we identify your needs and look at which factors play a major role in this. Depending on your customer demand, we look at which concept – concrete, steel, wood or hybrid – or which total solution for maintenance, renovation and alterations suits you best. This working method makes us extremely flexible in offering the best solution.

ALMOST 50 YEARS

At Remco International we are specialists in conceptual steel construction. We have been around for almost 50 years and build all over the world.

Our customers choose “one stop shopping” with us. We arrange everything for them, from design to turn-key delivery.
